C2i Solutions, Inc.

"YOUR EXPERIENCED IT SYSTEMS AND

INFORMATION SECURITY INTEGRATOR"

Corporate Overview

- Extensive IT Infrastructure product knowledge and experience

- Proven systems platform conversion expertise

- Large account, mission-critical experience

- Highly skilled, seasoned personnel

- Expert at Plan, Design, Implement and Manage (PDIM) process

- Veteran-Owned Small Business

Computing. Communications. Integration.

Infrastructure, Security & Networking Services

C2i
>>
C2i Solutions

Transition & Migration Services

- Consolidations – Data Center; Servers; Storage; SQL
- Assessment Methodology
- Legacy Source Code Analysis
- Application Portfolio Plan Development
- Program & Project Management
- Staff Augmentation Services
- Platform Migrations – Legacy VAX; Alpha; Sun; HP9000
- O/S Migrations VMS; Unix; Windows; Linux
- Middleware Implementation Services

Security & Network Services

- Assessments
- Penetration Testing
- Implementation Services
- Legal & Regulatory Compliance
- Secure Wireless
- Architecture Design
- Training
- Network Services
  - *Network Performance & Capacity*
  - *VOIP Design & Implementation*

Acquisition Registrations & Standards

✓ **Veteran-Owned Small Business**
✓ **Minority Business Enterprise**

DUNS # 12-4125407
PRO-Net ID # PO377148
Cage Code # 3FU12

NAICS Codes:

334220 – Wireless Comm. Equipment Manufacturing
541511 – Custom Computer Programming Services
541512 – Computer Systems Design Services
541513 – Computer Facilities Management Services
541519 – Other Computer Related Services
541611 – Administrative Mgmt. & General Mgmt Consulting Services
541690 – Other Scientific & Technical Consulting Services
541990 – All Other Professional Scientific & Technical Services

Buying Vehicles

- **GSA FEDERAL SUPPLY SCHEDULE** 70 – GS-35F-0697N (Teaming and Integration Agent Agreement)

- **NORTHROP GRUMMAN NETCENTS CONTRACT** # FA8771-04-D-0004 (sub-contract Team Member)

- **MULTIMAX NETCENTS CONTRACT** # FA8771-04-D-0009 (sub-contract Team Member)

- **HP ARMY ITES CONTRACT** # DABL01-03-D-1009 (Past Performance)

- **DHS FirstSource CONTRACT** #: HSHQDC-07-D-00025 (JVE and sub-contract Team Member)

- **Teaming Arrangements** available for other contract vehicles

Computing. Communications. Integration.

Key Strategic Partnerships

C2i Solutions' customer-centric focus provides a complete set of offerings via a comprehensive suite of products and services

6

C2i Services Team Value Points

- Our Team Understands Doing Business With the DoD

- Technical Expertise *Second To None*

- Project Management Always Utilized

- Services Quality Assurance Focused

- Proven Track Record of Highly Satisfied Clients

- Streamlined, Efficient Cost Model

- Diversity Procurement Benefits

~ *Quality Client Results Drive Our Behavior* ~

Computing. Communications. Integration.

A Proven Track Record of Success...

Company	Business Issue	Solution
Army TMCC	The Army needed the capability to communicate real time/full time on today's modern battlefield. They looked to NDS/C2i to develop a next generation tactical server solution for the military's deployable tactical network requirements.	The Army needed the capability to communicate real time/full time on today's modern battlefield. They looked to NDS/C2i to develop a next generation tactical server solution for the military's deployable tactical network requirements.
US Army - South Korea	An US Army base in South Korea needed to be trained in basic, and advanced management techniques of an off the shelf network firewall product. Management of the deployment of the assets and their conformance to US Army process and security policy was required.	C2i personnel traveled to foreign soil to perform an off the shelf training class and assist with the deployment of the systems as required. During the deployment unforeseen hardware issues confronted the project and a C2i Engineer/Instructor was proved to be address issue in a resource constrained environment and was able to complete the task successfully.
Army National Guard	The Army National Guard was readying the deployment of 50+ firewalls throughout the nation that would be managed from a centralized management platform. They looked to C2i personnel to create a customized training curriculum for their deployment and evaluate the design and personnel readiness capability.	C2i personnel took a off the shelf training solutions from the OEM Firewall vendor and customized the training curriculum for the product that was being deployed. In addition, a new training class was created for the electronic management product that did not exist prior. The Army National Guard personnel were so impressed that they asked the C2i consultants to stay through the first deployments to insure smooth operation. The deployment was a complete success.

A Proven Track Record of Success...

Company	Business Issue	Solution
U.S. Navy	The customer's global perimeter firewall was hacked by outside intruders and the Navy could not locate adequate resources to find a solution to their issue.	C2i personnel came in and redesigned and implemented a global perimeter firewall faster than any other solution provider. Nicknamed "The Dream Team" by the Navy, several future engagements ensued.
CDC **Centers for Disease Control and Prevention** **VAERS Program** **NCIRD**	CDCs ITSO and National Center for Immunization and Respiratory Diseases (NCIRD) had a requirement to replace their SUN based DB Servers with new technology for a new Oracle based analytics system as a component of their VAERS Initiative.	C2i Solutions teamed with HP to design and configure several HP Integrity based solutions to maintain the systems as mid-tier servers to avoid being positioned in the Unisys-dominated Primary Datacenter. Dual rx7640s/DAS and two DL380G5 were implemented (Prod and Back-up) to support this DB and UNIX Migration effort.
JITC Fort Huachuca	JITC upgraded the server databases in their training labs and were running an estimated 15 separate server CPU's for testing. These systems supported all different branches of the Military in addition to several government agencies. The outdated systems were loaded with Windows Server 2003 and Exchange 2003 with Web and FTP services.	Our goal was to transfer the outdated server systems to the new HP C-class blades and CCI architecture and help with the consolidation of the servers. This also added redundancy and improved performance for JITC at their centers while providing an enhanced testing environment. C2i Solutions also helped with training and loading of the software, verifying it was operational and provided long term technical support after the installation of the servers.
Navy Priority Materials Organization (PMO)	Convert ISIS/SPOE from an Oracle based application into a NET.ASP WEB application	C2i programmed the ISIS/SPOE enterprise solution and related applications based on the design, ensuring the system is web-centric and includes enterprise architecture and systems design for integration with current Department of the Navy (DON) information technology standards. Development included converting an Oracle based application into an ASP.NET web application.

Tactical Mobile Communication Center - TMCC

- Mobile –
  - Mounted in Mil-Spec Cases
  - Transport in the back of a HumVee or Suburban
- Rapid Deployment –
  - Automated Systems Provisioning
  - Switches built in. No wiring between blades and switches
- Reliable
  - 93% Operational Readiness Rate in Iraq
  - Intelligent Fault Resilience
